## Gasoline, Kerosene & Antifreeze

The best way to handle gasoline, kerosene, and antifreeze is to use it up as intended. Gasoline and kerosene will not go bad if they sit in a garage for the winter.

The Delaware, Knox, Marion, Morrow Solid Waste District may have an event in one of the four counties annually and as well as permanent by-appointment drop off locations. Visit [dkmm.org](http://dkmm.org) for more information.

Central Ohio Oil (795 Marion Road, Columbus | 614-443-9728) will also accept these materials free of charge throughout the year.
